PROFILE SUMMARY

Final-year Artificial Intelligence and Machine Learning undergraduate with strong interest in software development and AI-driven systems. Proficient in Python and SQL with hands-on experience building real-world applications including RAG-based chatbots, computer vision systems, and deep learning models.

Familiar with Data Structures and Algorithms (basics) and experienced in developing logic-driven solutions using modern AI tools and frameworks such as LangChain, FastAPI, and vector databases. Currently strengthening problem-solving skills and focusing on building scalable, production-oriented AI applications.

EDUCATION

Sri Sairam College of Engineering (2022– Present)

B.E Artificial Intelligence and Machine Learning

CGPA: 8.43

New Baldwin International PU College (2021–2022)

PUC (PCMB) – 85%

St. Joseph's High School (2020)

SSLC – 92.6%

INTERNSHIPS & TRAININGS

Data Science Intern – Take It Smart (*Feb 2026 – Present*)

- Working on real-world data-driven applications and predictive modeling
- Applied machine learning techniques for data analysis and insights generation

Machine Learning Intern – Learnflu (*Jun 2025 – Oct 2025*)

- Developed ML models for classification and prediction tasks
- Gained hands-on experience in model training, evaluation, and optimization

Intel UNNATI Training (*Feb 2025 – April 2025*)

- Worked on **GenAI Interactive Learning Games**, focusing on applying Generative AI for educational engagement
- Gained hands-on experience in AI-driven application development and interactive system design

PROJECTS

- ♦ **Enterprise Knowledge Chatbot (RAG System) (Ongoing)**
 - Built an enterprise-grade RAG system using LangChain with FAISS/Pinecone for multi-source data (PDFs, CSVs, web)
 - Developed FastAPI backend enabling real-time querying with metadata-aware retrieval
 - Improved contextual response accuracy across multi-document inputs
- ♦ **Multi-Document RAG Pipeline**
 - Designed a scalable retrieval system using embeddings and vector databases
 - Implemented top-k semantic search with contextual ranking
 - Focused on optimizing retrieval strategies and ranking for cross-document query handling
- ♦ **Smart Attendance System (Computer Vision)**
 - Developed real-time face recognition system using YOLOv8 and FaceNet
 - Implemented stabilization and duplicate prevention for improved accuracy
 - Automated attendance marking using live video streams
- ♦ **Next Word Prediction (Deep Learning)**
 - Built RNN and LSTM models for sequence-based prediction
 - Compared model performance and optimized accuracy
 - Deployed interactive prediction system using Streamlit
- ♦ **IPL Win Probability Predictor**
 - Developed ML model to predict match outcomes based on live inputs
 - Applied feature engineering and data preprocessing techniques
 - Improved prediction accuracy using model tuning

SKILLS

Programming & Core:

Python, C, SQL

AI/ML:

Machine Learning, Deep Learning (RNN, LSTM), NLP, Computer Vision

Libraries & Frameworks:

Scikit-learn, Pandas, NumPy, TensorFlow/Keras, OpenCV, FaceNet, YOLOv8

AI Concepts:

LLMs, Embeddings, RAG Pipelines, Prompt Engineering

Tools & Platforms:

LangChain, FAISS, Pinecone, Streamlit, Hugging Face Transformers, Git, GitHub

Web Technologies:

HTML, CSS (Basic)
